Hello,

The following submission has been created.

Track Name: AIC2026

Paper ID: 2733

Paper Title: Real-Time Multi-Domain Big Data Analytics for Smart Cities: Integration, Privacy, and Performance Evaluation

Abstract:

Rapid urban growth has increased the complexity of managing modern cities. Smart city initiatives use sensors and computing technologies to monitor and improve municipal services, with big data analytics playing a crucial role by enabling the simultaneous processing of diverse data sources. City systems such as transportation, energy, and public safety continuously generate large volumes of data that require real-time analysis.

This study presents a real-time data analytics system designed to process large-scale urban data and provide actionable insights for improving city services. The system focuses on three main objectives: integrating multi-domain data, ensuring data security, and enhancing analytics performance. By leveraging IoT data and advanced analytics techniques, the framework evaluates scalability, processing speed, and its ability to support informed decision-making.

To protect sensitive information, the system implements controlled data access and anonymization techniques. The results demonstrate that real-time analytics can significantly improve resource utilization, accelerate decision-making, and enhance overall service efficiency. The proposed methodology supports the development of scalable and secure analytics platforms that can grow alongside expanding urban environments.

Ultimately, the study highlights how big data analytics can enhance smart city operations, promote sustainable urban development, and improve the quality of life for citizens by enabling more effective governance and better public services.

Authors:

- mannat557.be22@chitkara.edu.in (Primary)

Primary Subject Area: Computational intelligence

Secondary Subject Areas: Not Entered

Submission Files:

MultiDomain_Smart_City_Data_Analytics.pdf (225 Kb, Tue, 28 Apr 2026 16:02:49 GMT)

Submission Questions Response:

1. Conflict of Interest
Agreement accepted
2. Status of using third-party material in your article.
I am not using third-party material for which formal permission is required
3. Certificate of originality

Agreement accepted

4. Corresponding Author's Contact number
+91 7814272154
5. Country Name
India
6. Authors Contributions
Mannat
7. Conference Rules and Guidelines
Agreement accepted

Thanks,
CMT team.
